

Mohammed Zyed Aragiddi

Computer Science (Data Science) Engineering — Data Scientist — AI/ML Engineer

Bengaluru, India — +91 7019716064 — zyed7094@gmail.com

linkedin.com/in/zyed-a-18786930a — github.com/zyed-110

Professional Summary

Results-oriented Data Science undergraduate with expertise in Machine Learning, Artificial Intelligence, Predictive Analytics, and intelligent system development. Experienced in healthcare AI, computer vision, environmental analytics, and real-time navigation systems using Python, SQL, TensorFlow, and modern ML workflows involving preprocessing, feature engineering, model training, evaluation, and deployment concepts.

Education

Bachelor of Engineering (CSE – Data Science)

KNS Institute of Technology, Bengaluru

2022–2026

CGPA: 7.3

Technical Skills

Programming Languages: Python, Java, SQL, JavaScript

Machine Learning: Classification, Regression, CNN, Deep Learning, Feature Engineering, Predictive Modeling

Visualization & Tools: Tableau, Power BI, GitHub, MS Office

Database Technologies: MySQL, PostgreSQL, SQL Query Optimization, Supabase

Web & App Development: HTML, CSS, React Native, Firebase

Internship Experience

Data Scientist Intern – SkillFied Mentor Pvt. Ltd.

2025

- Performed data preprocessing, transformation, and exploratory data analysis on structured datasets using Python and Pandas also Developed and evaluated machine learning models using TensorFlow and Scikit-learn for predictive analytics and data-driven insights.

Programming & Development Intern – Contriver

2026

- Developed AI and software-based applications using Python, machine learning, and computer vision concepts.
- Contributed to AI Navigation System and Neo-Breathe AQI platform involving intelligent analytics and real-time monitoring.

Deloitte Data Analytics Job Simulation (Virtual)

- Conducted business data analysis, reporting, and visualization using structured enterprise datasets.

Projects

Parkinson's Disease and Autism Prediction System

Tech Stack: Python, TensorFlow, OpenCV, Machine Learning

- Developed multimodal AI-based healthcare screening platform integrating voice analysis, handwriting recognition, MRI classification, and AQ10 behavioral assessment.
- Implemented preprocessing pipelines, feature extraction, and ML classification models for early-stage neurological disorder prediction.

AI-Powered Navigation System for Visually Impaired

Tech Stack: Python, YOLOv8, OpenCV, React

- Built real-time navigation assistant using computer vision, obstacle detection, and intelligent path-planning algorithms.
- Implemented audio-based guidance and environment analysis for smart mobility assistance.

Neo-Breathe AQI Monitoring & Forecasting System

Tech Stack: Python, AQI APIs, Scikit-learn, React

- Developed real-time AQI monitoring and air-quality forecasting platform using environmental sensor datasets.

Sound Guardian Trigger App (Hackathon Project)

Tech Stack: React Native, Firebase, JavaScript

- Built emergency response application with wake-word detection, real-time alerts, location sharing, and audio recording functionality.

Mini Projects: AI Voice Assistant — Movie Recommendation System — Image Detection Model — AI Story Generator

Certifications

IBM – Data Science 101 | EBSCO Information Services – On-Campus Training Meta

| Full Stack Web Development | AWS – Cloud Foundations

HP LIFE – AI for Beginners | Deloitte Data Analytics Job Simulation

Languages

English | Hindi | Kannada | Tamil
